**PRODUCT INFORMATION:** Product is an irrigation water amendment with a pH of 1, which treats the water. It reduces bicarbonates to avoid alkalinity, poor soil structure and low fertility. Product also increases water use efficiency as a result of better infiltration through the growing season, i.e., fewer, deeper, and more thorough irrigations. It also solubilizes micronutrients that are unavailable due to high soil pH, making them available to your turf.

**DIRECTIONS FOR USE:** SHAKE WELL BEFORE USE. This product should be used as a supplement to a regular fertility program. By itself, it will not provide all the nutrients normally required by plants.

**STORAGE:** Store between 50°-95°F. Avoid direct heat or fire. Decomposition may occur at high temperatures (above 225°F). Use all product within 12 months of its original date.
